

ICC **TIMBER**
◆ FLOORS ◆ CEILINGS ◆ WALLS

Quality meets technology

As the most innovative General Contractor in Sri Lanka, with over 3 decades of experience and trust in the industry, International Construction Consortium Pvt Ltd introduces ICC-TIMBER – giving you a selection of modern flooring solutions that lasts a lifetime.

Taking a step further into the future, we aim to revolutionize flooring methods using DIY installation systems, and to provide you with a range of modern yet convenient products!

Designed for Perfection

A wooden finish must be solid, durable and cost effective, yet aesthetically pleasing and tasteful.

ICC-TIMBER is designed to bring the features of the forest to your floor. These features are matched with finishes for a classic, timeless look and feel; palettes of contemporary colours provide a platform for any modern interior.

The finest in the Industry

Our Timber is sourced from sustainable plantations, both locally and internationally and manufactured at our own state of the art facility to the highest standards in the world, ensuring the finest product to your floor.

Our Range

Teak

Kumbuk

Para Mara

Cypress

Pre-finished Timber flooring

With pre-finished timber floors, ICC-TIMBER is taking timber flooring solutions a step forward from the traditional solutions in the market. From cutting down the lead time, to eliminating lengthy periods of distressful installation, ICC-TIMBER caters to your craving for the soothing touch of nature in a whisper of time.

To ensure, the defect free ready-to-install product reaches your doorstep, the timber planks go through a state of art production line designed to meet International standards. ICC-TIMBER delivers the warmth of rich timber to your feet, fast and hassle free.

Layer	Wood Flooring Construction	Coating Description	Purpose
6 th Layer		UV Cured Roller Coated 2nd top Coat	Scratch resistant, provides excellent visual experience, even and smooth touch
5 th Layer		UV Cured Roller Coated 1st top Coat	
4 th Layer		UV Cured Roller Coated intermediate Coat	Strengthens the coating structure, enhances wear resistance, blocks moisture movement
3 rd Layer		UV cured Roller coated sealer & hardener	
2 nd Layer		UV cured Putty application	Fills the unevenness in timber planks and provides a uniform surface
1 st Layer		Water Based stain	Stains the timber with the required colour
18mm Timber		Kiln Dried, Moisture content <12% Boron Borax Treatment	Seasoned for long-term weather changes

WARM TO THE TOUCH

The use of carefully selected, healthy materials -structured in multiple layers- are what makes ICC-TIMBER flooring so warm and pleasant to the touch.

EASY TO CLEAN

With our clean & green care series, the regular, efficient and gentle care of ICC-TIMBER Design Floors is child's play.

RESISTANT TO WATER

ICC-TIMBER series are perfect for kitchens and all areas of living that make a completely waterproof flooring necessary.

Elastilon

Our finished product is manufactured in a way to make installation hassle-free.

We utilize the revolutionary elastilon laying system, where the wood is pressed on an elastic self adhesive mat, making installations simple.
